SUMMARY

Motivated and detail-oriented software engineering graduate with a Higher Diploma in Computing and Software Engineering, proficient in modern web development technologies. Skilled in Javascript, Typescript, ReactJS, HTML/CSS, and Tailwind CSS, with strong backend experience in PHP and MySQL. Leveraging Git for version control and collaboration, I'm a fast learner with a passion for building innovative and user-friendly software solutions.

EDUCATION

B.Sc in Software Engineering

ICBT Campus, Awarded by Cardiff Met

📅 02/2022 - Present

- Covering key areas including data structures and algorithms, object-oriented programming, system analysis and design, and full-stack web and mobile development.

SKILLS

Javascript / Typescript

React JS

HTML / CSS

Tailwind CSS

PHP

MySQL

Java

Git

STRENGTHS

Problem Solving

Proficient at analyzing intricate technical challenges and designing effective solutions.

Quick Learner

Eager and adept at swiftly acquiring new technologies and applying them in practical settings.

LANGUAGES

English

Sinhala

Tamil

PROJECTS

Music App

📅 11/2023 - 11/2023

<https://mizzath-lyrics-app.netlify.app/>

- Developed a music discovery app, utilizing React.js, Redux, and RapidAPI integration. The intuitive interface enables users to explore diverse music categories, conduct precise searches, and stay informed of real-time local trends.

Master-IT

📅 10/2023 - 10/2023

<https://masterit.lk/>

Team Lead

- Led the development of "Master IT," a dynamic and responsive Learning Management System (LMS) that revolutionizes the learning experience. Leveraged a tech stack of HTML, CSS, JavaScript, Bootstrap, and jQuery for a seamless frontend, while building a robust backend with PHP.

Signature Cuisine

📅 07/2023 - 07/2023

<https://github.com/mizzath2003/SignatureCuisine>

- A dynamic restaurant web application utilizing JavaScript and PHP languages. The project focused on creating an interactive and functional platform for showcasing restaurant offerings and services.
